

Mohammad Zain Hammagi

Data Analyst & BI Engineer

Bengaluru, Karnataka, India | mo.zainhammagi@gmail.com | +91-XXXXXXXXXX | linkedin.com/in/zain-hammagi | github.com/zainhammagi12

PROFESSIONAL SUMMARY

Data Analyst and BI Engineer with experience spanning root-cause analysis, SQL-based reporting pipelines, Power BI dashboard development, and early data engineering work. MSc in Advanced Computer Science (Data Science) with Distinction, and a BEng in Mechanical Engineering. Comfortable moving between analyst-facing dashboard work and engineer-facing pipeline work depending on what a problem needs, with a growing focus on cloud data engineering and applied GenAI.

TECHNICAL SKILLS

Data Analysis & BI: SQL, Power BI, DAX, Power Query, Data Visualization, Root Cause Analysis, KPI Reporting, Dashboarding, Data Modeling, Star Schema

Programming: Python (pandas, NumPy, scikit-learn), PySpark, SQL (advanced querying, window functions, CTEs), Statistical Analysis

Data Engineering: ETL/ELT Pipeline Development, Apache Airflow, Data Pipeline Orchestration, Data Validation, MongoDB (NoSQL)

Cloud & Platforms: Microsoft Azure (Azure Data Factory, Azure Synapse Analytics), AWS (S3, Glue), Databricks, Snowflake, Docker, Git

Applied GenAI: Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, Claude API, OpenAI API, Vector Databases (FAISS)

PROFESSIONAL EXPERIENCE

Operations Data Expert <i>Teleperformance UK</i>	Sep 2024 – Apr 2026 <i>Glasgow, UK</i>
- Performed root-cause analysis on operational data across 500+ employee records for the DWP Universal Credit programme, translating findings into recommendations that improved SLA adherence and quality outcomes. - Built and maintained SQL-based data pipelines and Power BI dashboards, automating recurring reporting for a regulated, audited government contract. - Investigated data quality issues and escalations, documenting sources and methodologies to support governance and control requirements. - Collaborated with cross-functional stakeholders to translate business requirements into functional reporting and pipeline solutions.	
Data Analyst <i>Reliable Network Technologies</i>	Jun 2023 – Sep 2024 <i>UK</i>
Delivered data analysis and reporting supporting internal operations and client-facing data needs.	
Data Analysis Intern <i>Carmel Software Solutions</i>	Dec 2021 – Jun 2022 <i>Hubli, India</i>
Supported data collection, cleaning, and exploratory analysis on internal datasets using SQL and Excel.	

KEY PROJECTS

- Customer Churn Analytics Dashboard** | *Power BI, SQL, Python (pandas)*
- Analyzed a 6,687-customer telecom dataset, identifying a 26.86% churn rate and \$1.37M in revenue at risk through SQL-based segmentation and statistical analysis.
 - Built an interactive Power BI dashboard with DAX-based KPIs and churn driver visualizations.
- ETL Pipeline Extension: PySpark and MongoDB** | *PySpark, MongoDB, Python, Airflow*
- Extended a Python/Airflow ETL pipeline with a PySpark transformation stage and a MongoDB load stage, adding distributed processing and a NoSQL sink alongside the existing SQL warehouse output.
- Terrain Detection via Satellite Imagery (MSc Dissertation)** | *Python, PyTorch, U-Net, EfficientNet*
- Designed and trained a U-Net semantic segmentation model with an EfficientNet backbone for terrain detection from satellite imagery, evaluated using IoU and Dice coefficient metrics.
- RAG Q&A Tool over Customer Churn Dataset (In Progress)** | *Python, LangChain, FAISS, Claude/OpenAI API, Streamlit*
- Building a retrieval-augmented generation application for natural language Q&A over the churn dataset, using vector embeddings and semantic search grounded in source data.

EDUCATION

MSc Advanced Computer Science (Data Science), Distinction

University of Strathclyde, Glasgow, UK

Sep 2023 – Nov 2024

BEng Mechanical Engineering

Visveswaraya Technological University, India

Aug 2015 – Jul 2019

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) | DataCamp: Data Analyst in Power BI | PL-300: Microsoft Power BI Data Analyst (In Progress) | DP-203: Data Engineering on Microsoft Azure (In Progress)
